DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-4, drawn to compounds, classified in classes 544 and 546, subclasses 242+ and 184+, respectively.
 - II. Claims 5-8, drawn to a process of making, classified in classes 544 and 546, subclasses 242+ and 185, respectively.
2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product as claimed can be made by another and materially different process of making by varying the instantly claimed steps and using different reagents and reaction parameters.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
4. Claims 1, 3 and 5, 7 and 8 are generic to a plurality of disclosed patentably distinct species comprising the many variables, such as the various substituents which can be represented by the variables of A, B and Z. Applicant is required under 35

Art Unit: 1614

U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
